

Application of Wisconsin Electric Power Company
To Install Selective Catalytic Reduction Facilities and Associated Equipment on Edgewater Unit
5 for Control of Nitrogen Oxide Emissions
Docket No. 05-CE-137

Data Request PSC 06.05

Request:

06.05 Given the amount of renewable resources currently online and projected to come online, describe whether each of the owners are willing to submit these units into the MISO queue as economic, rather than self-scheduled or must-run.

Response:

Yes.
